

# Unified Application Management

## MARKET OVERVIEW & POSITIONING

Access Capture is a market leader in automated application packaging, testing, publishing, and deployment - unified application management.

It offers the widest range of application file formats, and it is compatible across devices, platforms, and operating systems, making it suitable for even the most complex of hybrid technology landscapes.

It also offers optimal flexibility, with APIs to integrate with existing tools as well as an intuitive, ready-to-go user interface.

## VALUE PROPOSITION

Access Capture is an application packaging and testing solution that delivers substantial financial, efficiency, and user experience benefits for organisations with complex hybrid ecosystems that want to optimise and automate technology management tasks.

It can be fully tailored to requirements and is compatible with all common application formats.

## Automated Application Management

Packaging >>> Testing >>> Publishing >>> Deployment

## KEY BENEFITS

### Save Time Through Automation

**Automate everything**, from understanding your application estate to packaging, testing (QA testing, UAT, smoke testing, performance testing), deployment, and publishing (IntuneWin32, SCCM object, & more).

### Make Better Decisions

Base your **software-related decisions** on data that is accurate and easy to visualise, digest, and understand. Set a direction based on what's actually possible within your estate. Move to Intune because you can with Capture.

### Adaptable to Your Requirements

Suitable for day-to-day operations, such as application updates, new releases, and new implementations, as well as large technology projects, **including Windows 11, Windows 365, and VDI migrations.**

### Mitigate Risks

**Reduce** the operational, financial, and reputational risks related to obsolete, out-of-date, and vulnerable software applications. Comply with the CES Scheme and avoid fines.

### Reduce Costs

**Reallocate valuable and time-pressured technology resources** to value added tasks. Our customers typically save 70-80% in costs, with fast ROI and employee satisfaction.

### Operate Your Way

Integrate Access Capture using an **API** or choose the **intuitive user interface**. Own and manage your estate efficiently and effectively.

Our clients have achieved an **85% reduction of manual effort** using Access Capture
