Contents

1 Introduction and Overview 13

Introduction to AdminStudio 15

About AdminStudio 15

New Features in AdminStudio 15

Import and Test Mac OS X Desktop Applications 16

Import Mac OS X Desktop Applications (DMG and PKG Files) 16

Import Links to OS X Desktop Applications in the Mac App Store 21

Test Mac OS X Desktop Applications 22

Publish Mac OS X Desktop Applications to Casper With Integration to App Portal 24

Ability to Inspect and Test Complex Installer Executables 31

Bundled Windows Installer Packages Now Listed on New Bundled Packages Tab 31

Can Perform Testing of Child Windows Installer Packages of Complex Installer Executables 32

Improved FlexNet Manager Suite Integration 33

Ability to Search Application Catalog for Unrecognized Applications 33

Ability to Create Local Flexera Identifier Entries for Internal or Repackaged Applications 35

Ability to Enter FlexNet Manager Suite URL 38

Enhanced Automation Capabilities to Streamline Application Import and Testing 38

Applications Are Automatically Tested Upon Import 39

Enhancements to Package Auto Import Feature 39

Enhanced Control When Using Import Wizard to Perform Batch Import from a Directory 43

Automated Application Converter Enhancements 44

Automated Application Converter for Repackaging Now Included in Professional and Enterprise Editions 44

Ability to Edit Default Automated Application Converter Settings From Application Manager 45

Can Edit Conversion Settings From the Conversion Wizard on a Per-Run Basis 47

New Wizard to Install and Launch Windows Installer Packages on a Virtual Machine for Testing 48

Productivity Shortcuts 52

New Shortcut to Automatically Create Transform for Selected Package in InstallShield 52

Ability to Browse to Package Location from Application Manager Tree 54

New System Center Configuration Manager Settings View 55

AdminStudio Tools and Functionality by Edition and Add-On Pack 56

Process to Package Applications 63

Packaging Process Outline 63

Step 1: Verify the Packaging Request 63

Step 2: Create the Storage Structure 64

Step 3: Package the Application 64

Step 4: Perform Test Case Tests 65

Step 5: Validate the Final Package 65

Step 6: Test Using Test Center 65

Step 7: Prepare Package for Deployment 66

Packaging Process Diagram 67

About Windows Installer Technology **68**
Features and Benefits of Windows Installer 68
Format of a Windows Installer Installation 69
Windows Installer Concepts and Terminology 70
Features and Components 70
Sequences and Actions 71
Properties 71
Support Resources **72**
Course Exercises **73**

2 Preparing for Application Packaging **75**
Defining the Storage Structure **76**
Setting Up Your Packaging Environment **77**
Development Environment 77
Repackaging Image 78
Preparing Project Documentation **78**
Overview of Documentation 78
Defining Installation Instructions 79
Defining the Acceptance Test 80
Other Documentation 81
Running Repackager on a Clean Machine **82**
Creating a Shortcut on the Clean Machine to Run Repackager Remotely 82
Using the Remote Repackager Installer to Create Shortcut to Launch Repackager Remotely 83
Manually Creating Shortcut to Launch Repackager Remotely 84
Installing Standalone Repackager on a Clean Machine 86
Editing Exclusion Lists **87**
Types of Exclusions Files: Shared and Custom 87
About Exclusions 87
Opening the Exclusions Editor Inside Repackager 89
Opening Exclusions Editor Outside of Repackager 91
Course Exercises **93**

3 Repackaging Process **95**
Repackager Best Practices **96**
Repackager Interface **96**
Repackager Home Page 97
Repackager Tools Menu 98
Using the Installation Monitoring Method to Repackage a Legacy Application **98**
About Installation Monitoring 99
Excluding Processes During Installation Monitoring 99
Using Installation Monitoring 101
Using the Snapshot Method to Repackage a Legacy Application **108**
Single Step Snapshot 108
Multiple Steps Snapshot 110
Cleaning Up after Repackaging **112**

Repackaging Process Output Files **114**
Viewing Captured Data in the Repackager Interface **116**
Captured Installation View 116
Files and Folders View 117
Registry Entries View 118
Shortcuts View 119

12 Testing Packages Using Test Center 335

Test Center Overview **336**

Benefits of Using Test Center 338

Test Run Optimization 338

Configuring Testing **340**

About Test Center Tests 340

Selecting Tests to Execute 342

Setting Automatic Fix Preferences for Operating System Compatibility and Browser Compatibility Tests 344

Performing Compatibility, Best Practices, and Risk Assessment Testing **346**

Performing Application Conflict Testing **347**

Testing for Conflicts Between Packages 348

Testing for Conflicts Between Packages and OS Snapshots 349

Viewing and Filtering Test Results **350**

About Status Icons 350

Viewing Summary Group/Application Test Results 352

Viewing Detailed Package Test Results 355

Viewing Summary Test Results 356

Viewing Operating System Compatibility Test Results 358

Viewing Application Virtualization Compatibility Test Results 360

Viewing Best Practices and Risk Assessment Test Results 363

Viewing Application Conflicts Test Results 365

Filtering Test Results by Suppressing Errors/Warnings 367

Resolving Issues **368**

Performing Automatic Issue Resolution 369

Performing Manual Issue Resolution 371

Viewing Test Summary Reports on Report Center Tab **372**

Distributing Packages **372**

Distributing Applications to System Center 2012 Configuration Manager Using the Distribution Wizard 373

Distributing Packages Using the Legacy Distribution Wizard 377

Legacy Distribution Wizard Distribution Types 377

Creating Administrative Installations for Packages 378

Distributing Packages to FTP Servers 379

Publishing a Package to Microsoft System Center 2007 Configuration Manager 380

Course Exercises **383**

13 Upgrading Products 385

Upgrades View **386**

Major Upgrades **387**

Preparing for Major Upgrades 387

Defining the Upgrade Settings 389

Validating a Product Upgrade 392

Deploying a Major Upgrade 392

Adding a Major Upgrade in a Transform File 392

A Sample Installation Instructions Template 393

Example Installation Instructions for Sample App 3000 396

Pre-Configuration 396

Installing Sample App 3000 396

Post-Configuration 398

Example Test Instructions for Sample App 3000 399

Basic Functionality Test 1 399

Basic Functionality Test 2 399

Basic Functionality Test 3 400

Basic Functionality Test 4 400

B Creating Workflows and Projects 401

Workflows 401

Viewing Workflows 403

Creating Workflows 404

Managing Tasks in a Workflow 404

Adding a Task to a Workflow 405

Specifying Workflow-Defined Command-Line Configurations for a Tool 406

Changing the Order of Tasks in a Workflow 409

Projects 410

Creating Projects 411

C Converting a Windows Installer Package to a Virtual Package 413

Benefits of Using the Automated Application Converter 414

Automated Application Converter Workflow Diagram 415

Preparing Virtual Machines 416

Virtual Machine System Requirements 416

Preparing Your Virtual Machines for Use With the Automated Application Converter 418

Adding Virtual Machines Using the Virtual Machine Import Wizard 421

Converting a Windows Installer Package to a Virtual Package 424

Launching Packages for Testing 435

Publishing Converted Packages 435

Enhanced Transform Support in Automated Application Converter 436

D Creating a Customized Virtual Package Using InstallShield 437

Building a Microsoft App-V Application 437

Getting Started 439

Step 1: Specifying Package Information and Deployment Options 440

Step 2: Managing Files in an App-V Application 441

Step 3: Setting Isolation Options for Folders and Files 442

Step 4: Modifying Shortcuts to the App-V Application's Executable Files 443

Step 5: Modifying App-V Application Registry Settings 444

Step 6: Setting App-V Application Registry Isolation Options 445

Step 7: Modifying Build Options 446

Step 9: Building an App-V Application 447
Step 10: Testing an App-V Application Using the App-V Application Launcher 449
Building a ThinApp Application 450
Getting Started 451
Step 1: Specifying ThinApp General Settings 452
Step 2: Managing Files and Folders in a ThinApp Application 453
Step 3: Setting ThinApp Isolation Options 454
Step 4: Modifying Shortcuts to the ThinApp Application's Executable Files 456
Step 5: Modifying ThinApp Application Registry Settings 457
Step 6: Modifying Build Options 458
Step 7: Building a ThinApp Application 459
